

Multimodal Container Logistics

samskip

Combining sea, rail, road and barge into the optimal transport solution

An extensive and reliable service network, strong customer focus and tailor made door-to-door solutions are just three of the ingredients that ensure Samskip retains its leading position in the busy European trades.

With four decades of door-to-door and shortsea experience and a sizeable fleet of vessels, containers and trailers, Samskip is the ideal partner for any organization transporting cargo across the European borders.

Samskip's comprehensive transport network spans all of Europe. Its extensive fleet of containers moves via ship, road, rail and barge to offer customers an optimal solution, customized to their specific needs.

A variety of transport modes across Europe

Samskip offers a variety of transport modes across Europe. Time, cost and destination all play a part in the choice of transport used for cargo movement. Fast and reliable transit times are guaranteed by choosing the optimal geographical, economical and efficient routing.

Sea

Samskip currently operates frequent services between the European continent and various destinations in the United Kingdom, Ireland, Spain, Portugal, Scandinavia, Poland, the Baltics and Russia.

Inland waterways

Customers who favour 'green' modes of transport can opt for Samskip's regular barge services, which run to and from a dedicated terminal in the Port of Rotterdam. The river transport option provides an efficient and cost-effective way of distributing and collecting cargo bound for and originating in the heart of the hinterland. Samskip uses modern barge terminals along Europe's inland waterway network, connecting the Netherlands, Belgium, Germany and the Central European hinterland.

Rail freight

Rail freight is an efficient and increasingly popular mode of transport. Long distance rail hauls for intermodal units are recognized as an environmentally sustainable service and as one of the solutions towards beating road congestion. Samskip runs daily and dedicated rail shuttles to destinations in Germany, Sweden, Spain, Italy, Russia and other European countries.

Road

Samskip's European haulage operation is one of Europe's largest. Collections and deliveries are planned with automatic planning systems and managed by experienced planners. Tracking and tracing capabilities are provided to the customer while all drivers are in constant contact with base operations.

Door-to-door service

Samskip is committed to the concept of multimodal and environmentally friendly transport solutions. Our door-to-door service integrates collection, shipment and delivery into a seamless transport solution. Extensive experience and dedicated staff assure that the cargo is delivered as agreed, while the customer has a single point of contact for the entire transport chain.

Quay-to-quay shipments

Our quay-to-quay service offers customers the possibility to use Samskip's extensive shipping network with their own equipment. Tank operators, bulk operators and deepsea lines benefit from the fixed and regular sailings across Europe.

Trailers

Samskip runs a complete trailer service in addition to its established multimodal container services. The Samskip trailer service meets customers' distribution needs by offering unrivalled connections between Continental Europe and the UK.

Wide range of equipment

Samskip's main emphasis lies with the 45ft pallet wide container. With its ability to transport 33 Euro pallets, the 45ft container makes multimodal and environmentally friendly transport a very competitive alternative to conventional road transport. The 45ft container is also available in a high cube, a reefer and a curtain-sided version. Furthermore Samskip carries 20ft and 40ft containers in its fleet. Flat-rack equipment is available to transport over-length, over-width and over-height cargo.

Customer focus

Samskip understands the importance of establishing and maintaining strong relationships with its customers. Dedicated sales and customer service capabilities in local offices ensure that Samskip is always close to the customer. Should a customer need to discuss bookings or trace shipments, Samskip is always at hand to help via personal assistance and its network of IT systems.

On-line and on-track

Samskip is continually developing and investing in its ISO-compliant software systems, such as the on-line real-time customer services functions. As a direct result, the thousands of transactions being processed throughout the transportation chain are further enhanced and accelerated.

Business value proposition

- A reliable Pan European multimodal service network.
- Easily accessible and easy to do business with.
- Tailor made service packages and solutions.
- Wide range of equipment with main emphasis on 45ft containers, including curtain-siders, flat racks and reefers
