

SOLUTIONS

Lightweight and
High Volume Solutions

samskip

> With a large fleet of mega Huckepack trailers, Samskip offers an ideal transport solution for lightweight high volume cargo across Europe.

Multimodal Network

Samskip offers pan-European, environmentally responsible combined transport services via shortsea, road, rail and inland waterway routes. We are committed to cost-effectiveness, operational excellence and best practice in sustainable transport.

High frequency services connect destinations across Europe, transported using a wide range of owned vessels, trains, containers, trucks and trailers.

In all cases shippers can make real choices based on frequency of service, transit times, freight rates and sustainability.

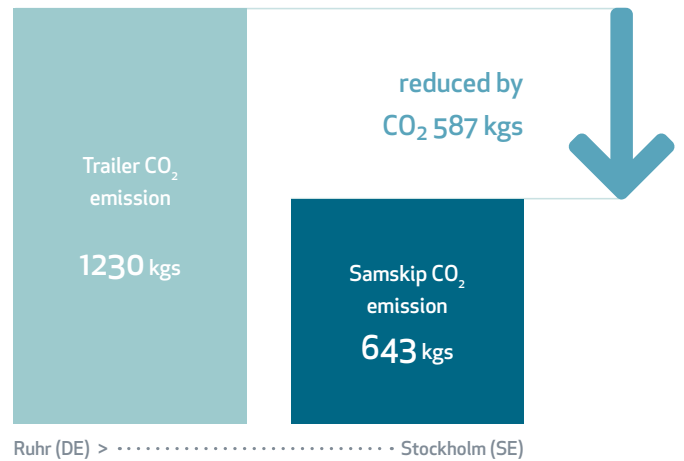

Geographical Coverage

From and to the main rail hub in Duisburg, using our large fleet of standard and mega Huckepack trailers, various rail connections can be made between Belgium, Denmark, Germany, Luxembourg, the Netherlands, Norway, Sweden and Turkey.

The multimodal service connects various parts of Europe while offering an environmentally friendly door-to-door transport service.

Sustainable Transport

Samskip is committed to delivering sustainable transport solutions. By efficiently combining the different transport modes, Samskip and its customers successfully take mileage off Europe's busy road network.

Lightweight High Volume Solutions

Samskip has a large fleet of standard and mega Huckepack trailers available, specifically designed for rail transport. The mega trailers offer an optimal combination of cost and transport efficiency. With a 3m internal height a 10% increase in volume can be achieved as compared to standard trailers. In addition, maximum payload is 28 tonnes and it is possible to load from the top, side and back.

Our mega Huckepack trailers are able to safely transport all lightweighted high volume products; e.g. paper, packaging, automotive (plastic components), isolating materials, healthcare & hygiene, barrels, tanks and white goods.

The Huckepack trailers allow lightweighted high volume products to be transported in a sustainable manner, while guaranteeing a fast lead time, high payload, and cost-efficient pricing.

For the specifications please check out our Equipment brochure.

Door-Door Services

Our door-door services integrate collection, shipment and delivery into a seamless transport solution. Our dedicated staff ensures that the cargo is delivered while the customers has a single contact for the entire transport chain.

Rail Terminal

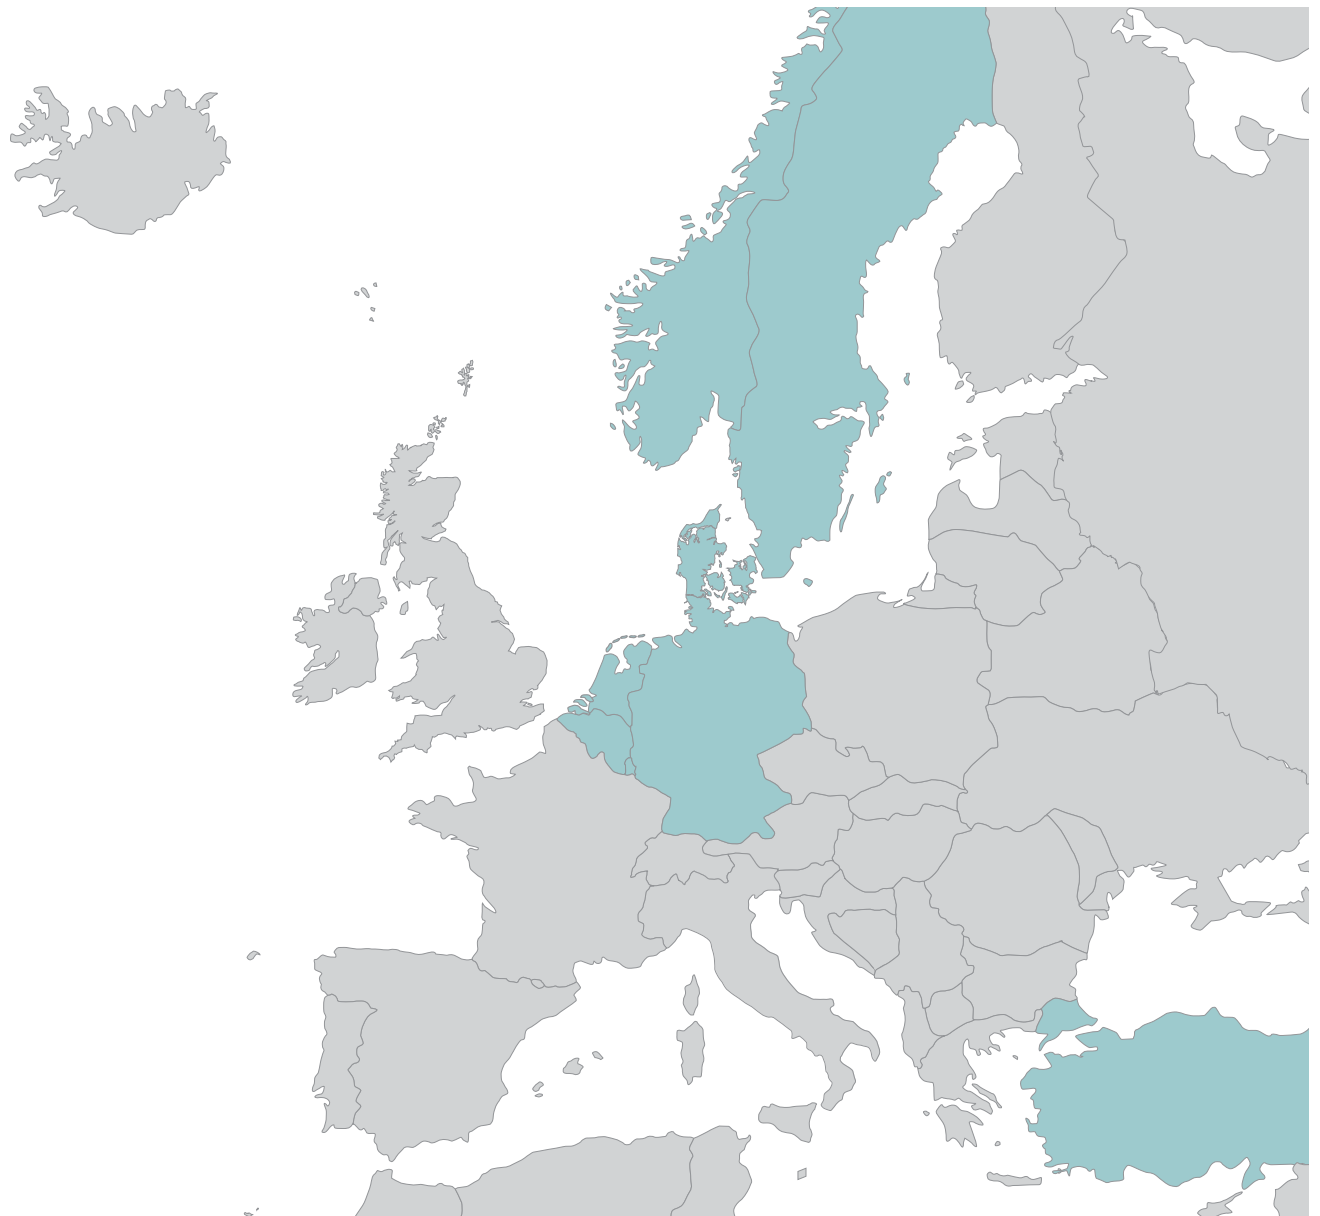

Samskip operates its own terminal in Duisburg. All our rail shuttles are handled via this terminal. The 140,000 sqm facility is equipped with seven tracks, each 700 metres in length, while two operational gantry cranes have been installed in 2014. With modern ICT solutions and high-tech gate functionalities, this new terminal meets the highest modern standards.

Local Services, Customised Solutions

Our dedicated sales and customer service teams offer customers the expertise and experience needed. Furthermore, the services have been certified to ensure the utmost quality for the customers.

Unique Advantages

- » High level customer-centric approach
- » Access to extensive pan-European multimodal network
- » Large fleet of standard and mega Huckepack trailers for rail transport
- » Frequent, reliable and cost-efficient services
- » Sustainable transport - lower CO₂ emissions
- » In-depth industry experience and expertise
- » Almost the same capacity and payload as normal trailers
- » Less vulnerable to driving hour restrictions, traffic jams and Maut taxes
