

Sweden Rail Product Fuel Floater November 2022

Dear valued customer,

The Sweden fuel adjustment floater for November 2022 is based on the weighted average of the fuel price development in Sweden, Germany and the Netherlands and is calculated over the period of week 38 till 41 of 2022 and set against the base period of the last 2 weeks of December 2021 and the first 2 weeks of January 2022.

Over this period the weighted average fuel price was EUR 1,907 versus a base fuel price of EUR 1,50. Samskip assumes a 20% share is applicable for Intermodal transports, resulting in following value is applicable for the month of November 2022: 5.4%

This is slight decrease compared to the 5,5% as advised for October.

The Sweden fuel adjustment floater is reviewed monthly and is published on the Samskip website: <https://www.samskip.com/surcharges/>

The floater % applied is based on the collection date of shipments.

In case you are invoiced in a different currency than in EUR, the surcharge will be converted based on the average rate of exchange over the above-mentioned period.

We trust that you understand our position and look forward to your continued support.

Sincerely,

Samskip Multimodal
