

# Samskip Energy Adjustment Factor *for Cross-Trade Routes*

19 December 2022

As of January 1, 2023, Samskip will implement an **Energy Adjustment Factor for Cross-Trade Routes**. A cross-trade is defined as a routing on which two different shipping services are used as part of our door-to-door solution to move your goods, for example from Finland to Great Britain, Ireland, Norway, Spain & Portugal and vice versa.

For January 2023 collections, the following EAF surcharge levels for Cross Trade Routes are applicable as shown in below table. The surcharge level applied is based on the collection date.

In case you are invoiced in a different currency than in EUR, the surcharge will be converted based on the average rate of exchange over the above-mentioned period.

The EAF surcharge is reviewed monthly and is published on the Samskip website:  
<https://www.samskip.com/surcharges/>

We trust that you understand our position and look forward to your continued support.

Sincerely,  
**Samskip**

| Trade           | United Kingdom | Ireland | Portugal | Spain   | Norway OF | Norway WC | Finland | Baltics | Sweden Shortsea | Sweden Rail |
