

Client Announcement

Sweden Rail Product Fuel Floater

June 2023

19 May 2023

Dear valued customer,

The Sweden fuel adjustment floater for June 2023 is based on the weighted average of the fuel price development in Sweden, Germany and the Netherlands and is calculated over the period of week 16 of 2023 till week 20 of 2023 and set against the base period of the last 2 weeks of December 2021 and the first 2 weeks of January 2022.

Over this period the weighted average fuel price was EUR 1,539 versus a base fuel price of EUR 1,50. Samskip assumes a 20% share is applicable for Intermodal transports, resulting in a value for the month of June 2023: 0,5%

The fuel level will therefore drop versus the value of May.

The Sweden fuel adjustment floater is reviewed monthly and is published on the Samskip website: <https://www.samskip.com/surcharges/>

The floater % applied is based on the collection date of shipments.

In case you are invoiced in a different currency than in EUR, the surcharge will be converted based on the average rate of exchange over the above-mentioned period.
Sincerely,

Samskip
