

Samskip FlexFuel Service:

Decarbonizing Your Supply Chain Made Simple

Immediate impact
Start cutting emissions today. FlexFuel reduces your carbon footprint from day one, no waiting, no complicated rollout.

Sustainable fuel sourcing
From fossil to future. We blend sustainable biofuels into our network, supporting the transition from fossil fuels to greener alternatives.

Verified data, real results
CO₂ reduction, backed by facts. All emission savings are certified and linked to your shipments through verifiable data.

No operational changes
Your logistics stay the same. No need to switch fleets, infrastructure, or processes. It's Samskip as you know it, just cleaner.

+ Stay ahead of regulation
Smart compliance. Stronger story. FlexFuel helps you meet evolving environmental standards while strengthening your sustainability credentials.

Make real CO₂ reductions for your business with no disruptions and no compromise. With **Samskip's new FlexFuel service**, cutting your transport emissions is easier than ever. We handle the procurement and blending of biofuels into our network, delivering direct, measurable emission savings for your business. **It's smart, seamless, and impactful, just the way sustainability should be.**
