

Spain

Santander - Zaragoza - Barcelona Rail Corridor

Connecting Northern Spain with Aragón and Catalonia

A new sustainable rail solution connecting Santander, Zaragoza and Barcelona, providing direct access to key industrial, retail and consumer markets across Spain.

Key Features:

- Direct rail connection between Santander, Zaragoza and Barcelona.
- Weekly departures: 20', 40' and 45' pallet-wide equipment capacity.
- Reliable multimodal solution reducing dependency on long-haul road transport.
- Strategic access to Northern Spain, Aragón and Catalonia through one integrated corridor.
- Direct connection to Samskip's shortsea and European rail network.
- Suitable for Automotive, Retail, FMCG, Chemicals and Industrial cargo.
- Sustainable transport solution supporting your CO₂ reduction targets.
- Access to major industrial and logistics clusters in Barcelona and Zaragoza.
- Multiple equipment types available including 45' pallet-wide units with truck-equivalent loading capacity.
- Potential customs and bonded solutions throughout Samskip's network.

Advantages:

- Sustainable alternative to road transport
- Reduced CO₂ emissions
- Reliable transit times
- Access to Samskip's multimodal network
- Strategic coverage of Northern Spain
- Connection between production and consumption regions
- Scalable capacity for future growth
