

Chilled, Controlled, and Always in Motion.

From frozen seafood to temperature-sensitive chemicals, cold chain logistics demands more than just refrigeration, it demands precision, planning, and experience.

Reefer Vessels

Dedicated and part-refrigerated vessels operating in key trades, optimized for frozen and chilled goods.

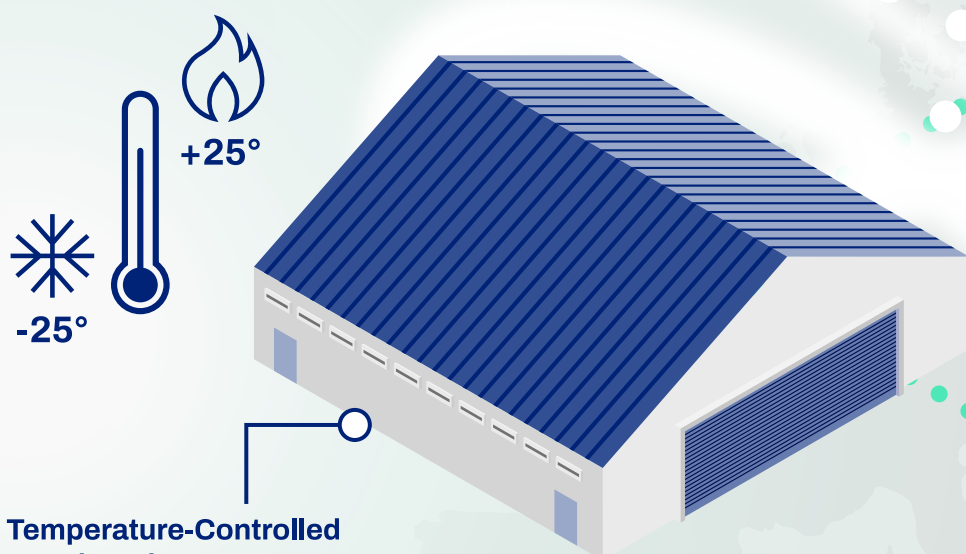

**Privately owned
45ft Reefer Containers**
High-cube reefers offer precision control and visibility from -30°C to +30°C.

Multimodal Cold Chain Integration

Combine sea, rail, and road transport while maintaining temperature consistency and optimizing for CO₂ reduction.

Ensure your product arrives as fresh as it left, partner with Samskip's cold chain team.

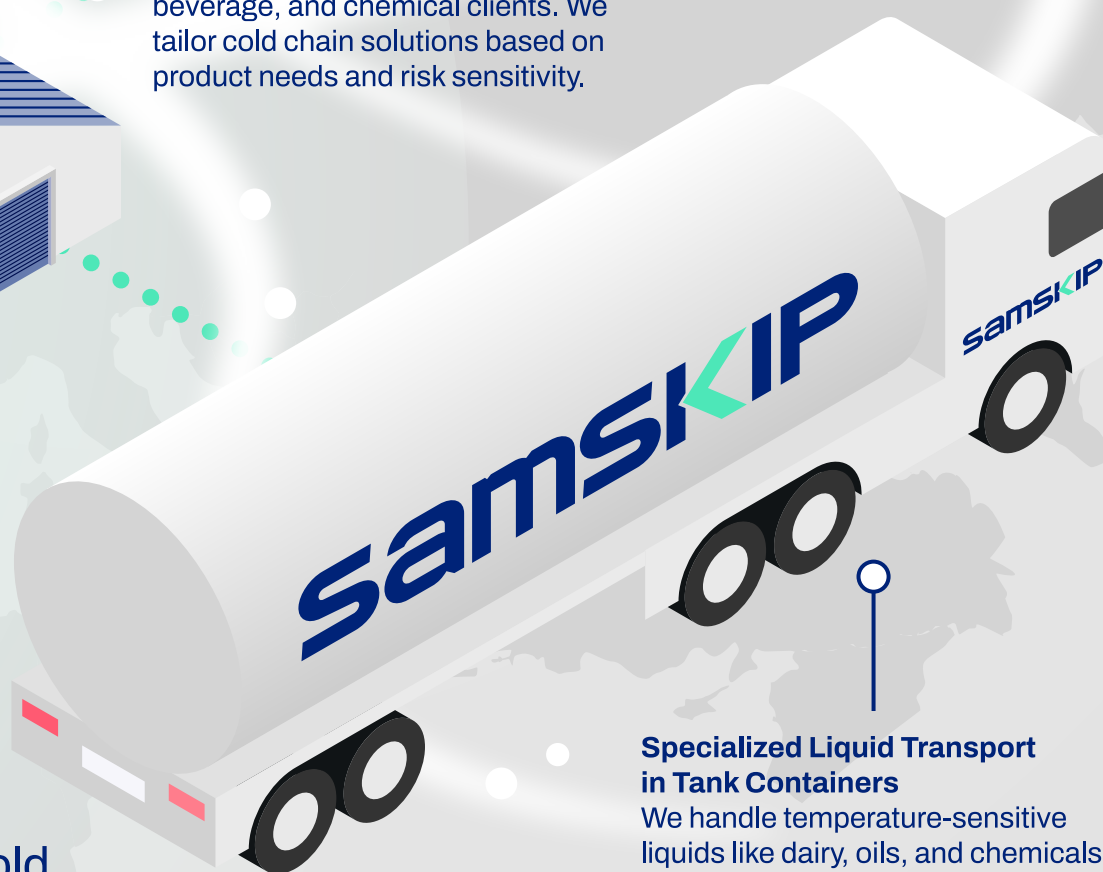

Temperature-Controlled Warehousing Across Europe

Strategically located facilities for storage, cross-docking, consolidation, and distribution, maintaining cold chain integrity on land.

Expertise Across Cold-Sensitive Sectors

Trusted by seafood, pharma, food & beverage, and chemical clients. We tailor cold chain solutions based on product needs and risk sensitivity.

Specialized Liquid Transport in Tank Containers

We handle temperature-sensitive liquids like dairy, oils, and chemicals in insulated and heated tank containers, safe and regulation-ready.

At Samskip, we offer a fully integrated cold chain across Europe and beyond, combining temperature-controlled warehouses, reefer vessels, and high-spec reefer containers. Whether you need deep-freeze, chill, or stable ambient environments, we ensure your cargo stays in perfect condition from origin to final delivery.
