

Containers Over Trailers

The Smarter, Safer,
Greener Choice

Deliver more value with smarter, more efficient logistics reducing risks, unlocking flexibility, and a greener supply chain

Switching from road-only trailer transport to 45ft High Cube Pallet-Wide containers unlocks real advantages for your business.

With Samskip's multimodal network, your cargo moves seamlessly across ship, rail, and truck combining cost efficiency, reliability, and sustainability. We offer much more than just reliable logistics. We also offer peace of mind, growth opportunities, and a smarter way forward.

Switching isn't just about containers. It's also about upgrading to smarter logistics, backed by Samskip's commitment to reliability, innovation, and greener supply chains.

Why Switch?

Containers unlock flexibility and resilience that trailers alone can't match.

The Samskip Advantage

Decades of expertise, one powerful network. Samskip makes multimodal easy.

Key Features:

- **Enhanced Cargo Security** – Steel-built containers with sealed rear doors reduce theft risk compared to trailers.
- **Lower Equipment Costs** – Container shipping reduces equipment-related expenses.
- **Financial Benefits** – Multimodal transport often proves more cost-effective than road-only.
- **Greater Flexibility** – Higher availability of equipment ensures smoother planning.
- **Sustainable Advantage** – Significant CO₂ reduction through rail and water versus trucks.
- **No Road Restrictions** – Unlike trailers, intermodal containers move freely during nights, weekends, and holidays.
- **Traffic Jam Avoidance** – Rail and water routes bypass congested roads, saving time.
- **Optimized Handling** – Standardized containers allow easy stacking and efficient transfer between ship, rail, and truck.
- **Maximum Payload Space** – 45ft HC PW containers accommodate up to 33 euro pallets.

Ready to unlock security, efficiency, and sustainability?
The solution is simple: switch with Samskip
