CUSTOMER  
UPDATE

## EAF D2D Surcharge

6 March 2026

Dear valued customer,

As part of our commitment to keeping you informed and supporting your planning, we would like to share an update regarding our **Energy Adjustment Factor (EAF)** for door-to-door services.

Recent geopolitical developments and the ongoing conflict in the Middle East have led to a sharp increase in global fuel prices, particularly affecting diesel and marine fuel markets. As fuel costs are a key component of transport operations, this has a direct impact on the cost of providing reliable logistics services.

While EAF adjustments normally follow a monthly update cycle, the current market volatility requires an adjustment for the remaining weeks of March. The updated EAF levels shown below will apply to **all bookings with a collection date from 12 March onward** and will remain in effect for the remainder of March.

These levels have been calculated conservatively based on current fuel price developments to ensure continued service reliability.

If you currently hold an **all-in rate agreement with Samskip**, your account manager will contact you directly to discuss how this update applies to your shipments.

The revised EAF levels are outlined in the tables below.
