

Client Announcement

Samskip Sweden Rail service – Fuel floater June Door - Door

27 May 2026

Dear valued customer,

The Sweden fuel adjustment floater for June 2026 is based on the weighted average of the fuel price development in Sweden, Germany and the Netherlands and is calculated over the period of week 17 of 2026 till week 20 of 2026 and set against the base period of the last 2 weeks of December 2021 and the first 2 weeks of January 2022.

Over this period the weighted average fuel price was EUR 1,927 versus a base fuel price of EUR 1,50. Samskip assumes a 20% share is applicable for Intermodal transports, resulting in a value for the remaining month of June 2026: 5,70%

The Sweden fuel adjustment floater is reviewed weekly during the crisis in the middel east and could be updated during the month of April if prices further increase. This will be published on the Samskip website: https://www.samskip.com/surcharges/

The floater % applied is based on the collection date of shipments.

In case you are invoiced in a different currency than in EUR, the surcharge will be converted based on the average rate of exchange over the above-mentioned period.
Sincerely,

Samskip
