

Client Announcement

Sweden Rail Product Electricity Floater July 2026 Door - Door

23 June 2026

Dear valued customer,

The Sweden Electricity floater for July 2026 is based on the weighted average of the energy price development, defined in KWH for the trains Samskip operates via Germany, Sweden and Denmark.

For the month of July 2026 the weighted average energy is set at 0,145 KWH. The Electricity floater has remained at the same levels versus June: 65 EURO per shipment

The Sweden Electricity floater is reviewed monthly and is published on the Samskip website: https://www.samskip.com/surcharges/

The value applied is based on the collection date of shipments.

In case you are invoiced in a different currency than in EUR, the surcharge will be converted based on the average rate of exchange over the above-mentioned period.

We trust that you understand our position and look forward to your continued support.

Sincerely,

Samskip
